Q2 What did you like about the training?

It was useful and a little bit new for me.

I didn't know about this tools to help monitoring performance and other issues. It will really be necessary. Thanks

Q3 What things can be improved in the training?

The sound.

When the instructor were speaking, the sound comes out with echo, and some times it was difficult to understand.

Q2 What did you like about the training?

The information transmitted was very well prepared, and practical examples well formatted and useful.

Q3 What things can be improved in the training?

The quality of the image when writing on the board (Sometimes Ram wrote small). And the microphone position when writing on the board.

Some kind of things is better to show as slide, like code snippet, because become more visible.

Q2 What did you like about the training?

1. Trainer readiness to share his novice experiences
 2. On time start and end of session
 3. Good discussion points to keep the audience thinking.
-

Q3 What things can be improved in the training?

1. Know-hows to debug various performance problems and debug them with sample apps and various approaches and patterns during the class trainings.
 2. More practical approach rather than theory.
 3. Extend the performance aspects to 3-tier apps and growing technologies to capture wider audiences.
 4. Automation scripts to capture thread dump and heap to single file in linux

Q2 What did you like about the training?

In general the training was good, I liked the training material shared, is easy to follow, there are good examples, is helping me a lot, I was able to understand and fix a memory leak issue we're having in my company. Thanks Ram.

Q3 What things can be improved in the training?

The first session was difficult to follow, too much echo, I couldn't hear properly what you were saying, I don't know if it was my network or your microphone.
