☆ 5

Q2 What did you like about the training?

the tool and the benefits of using these Cool tools in YCRASH
how to analyse and pin point about the issue
More detailed information on what is the role of JVM and the heap in these issues

Q3 What things can be improved in the training?

nothing as such with the training . Ram was absolutely good and upto the skills

Q2 What did you like about the training?

I liked how he had a very strong knowledge of the java substructure and was able to teach from about the basic memory system and how it affects everything. Show casing how to troubleshoot issues manually and how to use ycrash was very nice.

Q3 What things can be improved in the training?

Maybe some time spent on collecting the heaps, perhaps a few more examples.

4

Q2 What did you like about the training?

There was a clear progression of topics with a lot of depth. There wasn't much in the way of 'sales' which these types of training often resort to. I really appreciated the almost purely technical approach to the sessions. It was refreshing.

Q3 What things can be improved in the training?

1. Preset agenda shown and discussed at the start of the presentation (2-3 mins).
 2. The camera switching can be troublesome.
 3. The camera is often blurry (bandwidth / resolution issues) which makes the white board sessions difficult to follow.
 4. Pauses for simple questions work well in classroom settings but interrupt the flow of instruction online.

Q2 What did you like about the training?

liked the tools much and the way of teaching was simple and good.

Q3 What things can be improved in the training?

everything was fine, sometime vide was blurry ... I like the way whiteboard teaching, but if you do better quality camera would be more visible

Q4 Your Name (optional):

Madhav Sapkota
