## Q2

What did you like about the training?

The access to quality information and resources

---

## Q3

What things can be improved in the training?

Just an idea...  
Gather smaller and more like minded groups to work in more specific issues.  
There are infinite possibilities for Working Sessions.  
Thank you for this huge opportunity.

---

## Q4

### Q2

What did you like about the training?

I like the the fact that Ram is straight forward and calls it the way it is. He isnt cut throat. as an example he said at this time heap hero doesnt match the capabilities in Eclipse for heap dumps. But GC easy and fast Thread are the best in the world at this time. That kind of honesty is much appreciated and speaks volumes about what kind of partner Tier1app can be.

---

### Q3

What things can be improved in the training?

I have no Idea what else can be changed or added to this very short time frame and still appeal to a wide range of expertise. Ram is very good at evaluating the knowledge level of his class and adjusting accordingly. This is a Class that I would pay for out of pocket even if my company would not have paid for it. I will be recommending this training for others in our company and to anyone that is involved with production Java products. Thank you!

---

## Q2

What did you like about the training?

I like all of the training documentation and real world examples. This training reinforced that a lot of our current practices are correct. I will likely have new members of our team attend this in the future. I also liked the half day format of the class.

---

## Q3

What things can be improved in the training?

The quality of the video was pretty low at times. Maybe add two short breaks instead of one longer.

---

## Q2

What did you like about the training?

Interesting insights in Troubleshooting JVM.  
Even with 20 years work experience there are things you don't know.  
Great when someone with deep insights explains things

---

## Q3

What things can be improved in the training?

I liked day 2 troubleshooting most, but that is a personal choice.  
Learned the most new things there  
But i think it was a very good mix and overwie

**Q2**

What did you like about the training?

The detailed view how the JVM works and which configurations are helpful to set.

Also the ways to troubleshoot and especially the possibilities to tune the performance and save resources where very interesting and helpful.

**Q3**

What things can be improved in the training?

Some high level topics are imho not necessary to explain in such a detail, but I understand that they are explained so that everyone has the same level of understanding.
