3**Q2**

What did you like about the training?

Trainer covered the basic topics well. Its an excellent course for beginners.

Q3

What things can be improved in the training?

I was looking for advanced performance tuning tips using the GCeasy and fastthread. Though you cover some of them, i was expecting more tuning tips for highly sensitive environments.

☆ 5

Q2

What did you like about the training?

I got to know how to analyze Heap dump, thread dump and GC logs to root cause the issue. I was very hesitant to analyse these dumps ,but after this training I got more confidence .

Q3

What things can be improved in the training?

I feel some more real-time issues should be covered to get hands on experience .

5

Q2

What did you like about the training?

The course was really interesting and helpful. Knowing how to analyze and understand thread dumps and different types of JVM errors helped me to solve a problem on a large production instance on the very first day:)

You will never find such a clear explanation of JVM internals if you are a novice in a JVM world.

Many thanks to Ram for sharing his knowledge with us!

Q3

What things can be improved in the training?

We want more!)

5

Q2

What did you like about the training?

The course covered the fundamentals of JVM, which most of Java developers lack of. The instructor has also shared lot of techniques/tips for capacity planning, performance tuning and production debugging.

Q3

What things can be improved in the training?

IMPO, the agenda could have been little more organized.
